

MEMORANDUM FOR: JTH F.Y.I.

John:

[] stopped by to alert you to a situation. You may receive a call on (from whom he does not know) concerning a computer program that we have developed successfully for our Digital Image Manipulation Project. This computer program evidently is creating great interest in OSP, ORD and OCS circles and

[] is receiving feelers to borrow the program, so that these other offices may conduct their own experimentation. [] feels that such a request is premature and that we cannot make it available until we do further work. He plans to talk to [] about this later today or tomorrow.

Declass Review by NGA

His concern is that you may receive a call from one of the above sources requesting that you authorize the loan of the computer program. He would hope that you would head off such a request by saying that we need further time and more development before it is in shape to make available to others.
